8- PRODUCTS

INFUSION THERAPY

1. I.V. CANNULA
2. I.V. INFUSION SET
3. MICRO DRIP I.V.SET
4. I.V. INFUSION SET WITH FLOW REGULATOR
5. I.V. SET WITH AIR VENT
6. BURETTE SET
7. FLOW REGULATOR
8. THREE WAY STOP COCK
9. THREE WAY STOP COCK WITH EXTENSION TUBE
10. LOW PRESSURE EXTENSION TUBE
11. HIGH PRESSURE EXTENSION TUBE

ANAESTHESIA & RESPIRATORY CARE

1. SUCTION CATHETER (Plain)
2. SUCTION CATHETER (Thumb Control)
3. NASAL OXYGEN CANNULA (Adult / Pediatric / Neonatal)
4. OXYGEN FACE MASK (Adult / Pediatric)
5. NEBULIZER MASK (Adult / Pediatric)
6. GUEDEL AIRWAY
7. MUCUS EXTRACTOR
8. ENDOTRACHEAL TUBES
9. REINFORCED ENDOTRACHEAL TUBE WITH CUFF

UROLOGY

1. NELATON CATHETER (MALE)
2. NELATON CATHETER (FEMALE)
3. URINE COLLECTION BAG FOR ADULTS
4. PEDIATRIC URINE BAG
5. URINE COLLECTION BAG WITHOUT OUTLET (EMPTY BAG)
6. URINE COLLECTION BAG WITH SAMPLING PORT
7. LATEX FOLEY CATHETER
8. SILICONE FOLEY CATHETER

GASTROENTROLOGY

1. RYLE'S TUBE
2. INFANT FEEDING TUBE

BLOOD MANAGEMENT

1. BLOOD ADMINISTRATION SET
2. MEASURED VOLUME BLOOD ADMINISTRATION SET (HEMOSET)

WOUND DRAINAGE

1. YANKAUER SUCTION UNIT
3. CLOSED WOUND SUCTION UNIT (HEMOSUC)

OTHERS

1. UMBILICAL CORD CLAMP (Standard/Premium)
2. A.V. FISTULA NEEDLE
3. SURGICAL GLOVES
4. EXAMINATION GLOVES
5. FACE MASK EAR LOOP TYPE (3PLY)
6. INFUSION & EXTRUSION PARTS

9- Facilities

The total land space on which ULTRAMED is established is around 13,250 square meters.

ULTRAMED family is reaching now more than 1200 members scattered among production, quality, maintenance, business development, marketing and sales teams.

10- Quality Standards

Ultramed quality control system encompasses a comprehensive series of visual, physical, chemical and biological tests and inspections at each pertinent stage in the production cycle, from constant surveillance of raw material, intensive control of all materials, manufactured parts and assembly steps, to the final inspection and testing of final products. This cycle involves several trained personnel with most advanced tools and equipment.

11- Departments:

Laboratory: Our advanced equipment and skilled chemists make our lab one of very few laboratories in our field that have the Egyptian license to make all the quality tests inside the factory directly.

Molding & Extrusion: We have very up-to-date machinery that is run by qualified technical engineers. Training abroad is much supported to ensure a full understanding of the job.

Inspection: This department's main task is to maintain the best quality that Ultramed targets along the way. Its chemists and employees are very well trained to achieve this goal. All non-conformity reports are subject to full inspection to ensure a 100% high quality of each single product.

Clean Room: In this crucial part of the factory, we try to keep as ultimate cleanliness as we can. Production process inside is run by very skilled operators under the supervision of highly trained engineers and chemists whose main task is to cope up with the quality standards. Our 2200 meter-square clean rooms of class100,000 are available to make sure that production is done under top clean atmosphere.

Sterilization: Here, we do both jobs consequently. We do final inspection for the packaging of each and single product to double check the quality constraints and then we do the sterilization to our products using our ETO gas sterilizers to assure the quality requirements.

Warehouse: Raw material, Bulk parts and final goods are kept in separate warehouses where atmospheric conditions are always controlled of total of 32 warehouses.
